---

BEING

---

REAXXER

---

“LIFE IS NOT PREDICTABLE”

---

**LIFE IS FULL OF UNKNOWNNS**

Challenges of everyday life put a considerable strain on us, from a physical and mental point of view. At least once in our lifetime, we all have to react promptly to unpredictable situations. Reacting represents the key for individual psychophysical well-being and the first keyword for being a Reaxxer.

---

---

REAXXER

---

# CONCEPT

---

“LET’S TRAIN FOR UNPREDICTABLE”

---

**THE REAXXER PROJECT** was born as a lifestyle more than a training method. The observation of unpredictable situations we face in our everyday life teaches us how to be more reactive, confident and able to manage future challenges. Being a “REAXXER” means to increase, multiply and speed up the capacity of giving a proactive response to the obstacles we meet.

---

# METHOD

## NEUROREACTIVE TRAINING

The Neuroreactive training is an innovative system conceived in 3 actions that allows to achieve faster and better results in terms of: health, fitness, performance. It relays on the innovative patented technology of Sudden Dynamic Impulses that is applied on 2 different product lines: FLUIWAVE and FLEXWAVE – the dynamic weights. The peculiar structure of these equipment produces a higher physical and mental response during any kind of training or exercise, even the easiest and most intuitive one. The result is a more efficient and reactive body, both neurologically and physically, thanks to a simultaneous and constant muscular, cerebral, and sensorial stimulation.

### CONNECTING

OUR EQUIPMENT  
SENDS DYNAMIC IMPULSES  
DURING THE EXERCISE

### PROCESSING

THE BRAIN PROCESS  
INSTANTLY THE  
STIMULATIONS RECEIVED

### REACTING

THE BODY ACTIVATES  
A HIGHER AND AUTOMATIC  
NEUROMUSCULAR RESPONSE

# TRAINING TOOLS

EASY AND PROGRESSIVE EXERCISES FOR ANY LEVEL OF TRAINING TO TRAIN EVERYWHERE IN A VARIOUS AND EFFICIENT WAY REACHING HEALTH AND FITNESS GOALS FASTER.

**FUNCTIONAL**  
PERFORMANCE  
& DAILY ENERGY

**POSTURAL**  
NATURAL BALANCE  
& STRENGTH

**PILATES**  
ELASTICITY  
& MOBILITY

**YOGA**  
RELAXATION  
& HARMONY

## + SAFETY

ZERO DAMAGE FOR THOSE WHO TRAIN  
AND FOR PEOPLE AND THINGS AROUND

## + RESULTS

BETTER RESULTS IN LESS TIME AND  
MORE PHYSICAL AND MENTAL EFFICIENCY

## + EASE OF USE

INTUITIVE EXERCISES FOR ALL AGES  
AND FOR EACH LEVEL OF TRAINING

# FLUIWAVE TECHNOLOGY

The innovative technology for fitness tools that changes completely the inner concept of training. The special fluid inside makes every exercise reactive and more efficient: the unpredictable movement of the liquid guides dynamically every movement during the exercise, causing a continuous interference that entails a constant body and brain adaptation and so a higher neuro-muscular reaction. The structure, totally healthy, crushproof and literally unbreakable, is totally leak-proof and it is tested not to break even when squeezed by an 8tons truck or when falling from 10mt building. First PUMP, BALL and KETTLE in the world Fluid Inside and Soft Impact, ready to be used everywhere because safer for the user and for those around, reducing dramatically the risk of injuries and zero damages for furniture and floors.

Innovative medicine ball with internal dynamic fluid.

REAX FLUI revolutionizes functional training because it is the only ball in the world with internal fluid that makes it dynamically unstable. More versatile and effective than a traditional ball, it allows countless exercises with a greater calories consumption and greater muscle involvement.

## REAX FLUI

REAX FLUI is more performing, thanks to the movement of the liquid that transforms each exercise into a real neuromuscular training, simple but definitely more effective from a metabolic point of view. The continuous displacement of the liquid mass produces interferences that make each repetition of each exercise different:

so it requires continuous and unpredictable adaptations. Zero boredom, zero habit: your body responds more efficiently to training as it is stimulated in a different and unpredictable way. The result is a more effective workout at any intensity, also useful for faster functional weight loss because it allows to burn up to 500 kcal per session.

## WINNING FEATURES

Whatever the type, goal or intensity of your workout, training with REAX FLUI you can:

- increase calorie expenditure and stimulate metabolism
- increase strength, power and muscle tone
- improve balance, posture and coordination skills
- significantly reduce the risk of accidents

Soft but resistant, REAX FLUI allows to train wherever you want because it is:

- **EXTREMELY SAFE** in terms of accident prevention and hygiene;
- **IDEAL AT HOME** because its soft structure doesn't damage furniture and floors;
- **PRACTICALLY UNBREAKABLE**, it resists to all types of stress and it can also be used outdoors.

 HAND PUMP

The only dynamic and most effective pump, safe & soft shock. REAX PUMP is the first barbell in the world that allows to work with variable, unstable and combinable loads, revolutionizing weightlifting in the fitness world. The internal fluid generates motor stimuli and interference for a much higher muscle activation than that obtained with any other barbell.

## REAX PUMP

REAX PUMP is composed of three elements that can also be used separately: a bar and two balls which are not simple weights but elastic balls with a variable quantity of internal fluid which determines their weight.

The unpredictability of the liquid contained in the two loads transforms any exercise into intense neuromuscular activity. The intensity of a single exercise is given not

only by the weight of the barbell but also by the degree of instability of the liquid inside: the more it moves, generating more stimuli, the more effective the exercise will be in terms of calories burned and muscle activation.

Versatile and easy to use, it fits into various training programs ranging from cardio training to toning up and crossfit, increasing its effectiveness.

## MODE OF USE

## AND CONFIGURATIONS

### 1 SYSTEM, 4 CONFIGURATIONS

The REAX PUMP system allows you to modulate and customize the intensity of the workout and perform an infinite number of exercises, because it can be used in 4 different configurations:

- > Use of only one REAX PUMP BAR
- > Use of REAX BAR with a REAX PUMP BALL
- > Use of REAX BAR with two REAX PUMP BALL
- > Use of 2 REAX PUMP BALLS.

## WINNING FEATURES

- **SOFT-SHOCK** Thanks to its elastic nature, it is a unique functional tool of its kind: it can be used in complete safety and it can be thrown, lifted or slammed without damaging the surfaces.
- **VERSATILE AND MODULAR** Different weights and configurations allow to customize each training program, enhancing any exercise compared to standard products.
- **SIMPLE AND PROGRESSIVE** Intuitive and multipurpose, it allows a new approach to Functional training or Pump, for athletes or users of various training levels and of all ages.
- **BEAUTIFUL AND DURABLE** Italian design and quality guarantee ergonomics and functionality to a tool that is beautiful to look at, surprising to use and built to last.
- **EASY TO TRANSPORT AND SPACE SAVING** Robust and easy to clean, it is perfect for workouts in indoor spaces such as home and gym, but also outdoor in parks or playgrounds.

REAX KETTLE is the world's first dynamic and elastic kettleball. Dynamic because it is the only one with internal fluid that enhances the effectiveness of each exercise, from the simplest to the most advanced. Elastic because externally soft and shockproof, it can be used safely even in small spaces, at home or outdoors. The elastic and dynamic structure makes it a unique functional tool of its kind.

## REAX KETTLE

REAX KETTLE is a special soft kettlebell, the only one that allows to work with an unstable variable load because it incorporates a liquid mass with small steel spheres that move with you at every exercise.

The variable quantity of fluid determines its weight. Its movement instead, produces unpredictable stimuli that represent its extraordinary technical innovation.

Fluweighths technology makes it more effective than any other kettlebell because it stimulates a greater neuromuscular response and therefore a higher calorie consumption. The unpredictable movement of the fluid transforms each training into a high intensity activity: versatile and easy to use, it allows to modulate and customize all training programs.

## FLUID INSIDE

# WINNING FEATURES

## OFFICIAL TRAILER

- **SOFT IMPACT**  
It can be thrown, lifted and slammed to the ground without damaging surfaces: in this way, you can use it in any environment. The softness significantly reduces the impact on surfaces and for this reason it can be used with ease even at home or in small spaces.
- **RESISTANT AND NON-DEFORMABLE**  
It is also suitable for outdoor training because it is sturdy and it does not fear any kind of "mistreatment": its structure remains unchanged for a long time.
- **EASY TO CLEAN AND SANITIZE** - Thanks to its special waterproof plastic surface, it can be easily washed and sanitized with antibacterial detergent.
- **PRACTICAL AND SPACE-SAVING**  
Easy to carry and space-saving, with Reax Kettle you can take functional training anywhere: in the peace of your own home or in outdoor spaces.
- **ITALIAN QUALITY**  
Designed and made in Italy with the best materials.

## SHOCK TEST

**The only one with Soft Shock system**, it prevents injuries while you train and protects people and things around you: you can easily use it at home and in tight spaces.

**Soft but sturdy**, it does not damage surfaces and it is tested to resist, without damaging the floors, even if it falls from over 10 meters high.

**Ideal for indoor and outdoor use**, it is non-deformable and it maintains its elasticity and performance over time.

REAX KETTLE is suitable for functional training and motor reeducation of beginner or advanced level users and for the preparation of amateur sportsmen and professional athletes. With its dynamic load, it goes beyond the usual functional training and it contributes more effectively and quickly to

- develop strength and endurance
- improve sports performance
- increase balance and stability
- increase coordination
- increase energy consumption
- decrease the risk of injuries

# FLEXWAVE TECHNOLOGY

FLEXWAVE is the patented technology internationally awarded for the extraordinary innovation that evolves the traditional training protocols. The flexibility of the shape and structure of our equipment allows to experiment new and versatile training exercises that stimulate and involve in a reactive way the entire neuro-muscular system. First flexible weights in the world, the FLEXWAVE tools can replace many traditional training equipment adding the Neuroreactive component that makes any session more intense and efficient but also intuitive and progressive. The special internal metal thread guarantees flexibility but crushproof even after extreme uses, while the external thread, soft touch and waterproof, makes it extremely safe for people and objects and so highly suitable for indoor-outdoor use.

REAX CHAIN is the one and only weight in the world with patented Flex Wave technology. It is the unique, flexible and multipurpose chain that evolves fitness & sport with more engaging and effective Neuroreactive training. The ability to wear it, to use it in pairs, to launch it on surfaces in complete safety multiplies the opportunities for use compared to the usual functional tools.

## REAX CHAIN

REAX CHAIN is based on kinetic chain and on generation of unpredictable impulses that make each repetition of any type of exercise different and more effective. It is a special heavy rope with rings that allows you to perform countless dynamically unstable exercises, for high intensity neuromuscular and functional training.

The flexibility of the weight allows continuous stimulation during workout so it generates a higher body response, enhancing any training: the result is greater metabolic consumption and more complete muscle activation generated by the continuous unpredictable movement of the dynamic load during the exercise.

## FLEX FRAME

CERVICAL SPINE

THORACIC SPINE

LUMBAR SPINE

HIP JOINTS

KNEE JOINTS

ANKLE JOINTS

The concept of kinetic chain is the base of the research on body movement. The human body is conceived to realize multiple actions and not single movements: hence the evolution from a sectorial view of training to a global one.

The concept of REAX CHAIN is inspired by the human body kinetic chains and to their multiple functions: a real revolution in training that combines in one single tool: proprioception, strength, mobility, and coordination.

## KINETIC CHAIN INSPIRATION

Every movement realized with REAXCHAIN entails dynamics combinations and a different use of strengths on many levels. Thanks to its flexibility and to the progressive charge it causes unbalances that have to be managed activating an intuitive actions control, more progressive and efficient.

## WINNING FEATURES

- **VERSATILE** Thanks to its ring configuration, it is a tool suitable for performing countless free body exercises, from the most traditional to the most modern.
- **FLEXIBLE** Flexibility differentiates the various repetitions of the motor gesture, and it is possible to use it for infinite exercises by exploiting its inertia, dynamics and centrifugal force.
- **WEARABLE** The special shape and the total flexibility harmonize with the body to perform pull-ups, push-ups and any other type of bodyweight exercise.
- **USER FRIENDLY** The particular softness allows to grip it, squeeze it, step on it, fold it or throw it freely and without damage to surfaces.
- **ADJUSTABLE** Different weights allow to adjust the intensity of the workout according to the use: ideal for functional training or to train with family or friends.
- **SAFE AND RESISTANT** Quiet, pleasant to the touch and ultra-resistant. Thanks to its softness and silence it is perfect for home fitness and outdoor training: it does not fear mistreatment and it is easy to clean.

### REAX CHAIN TWO

1 - 2 - 3 KG | 2,2 - 4,4 - 6,6 LB

### REAX CHAIN FIVE

2 - 4 - 6 - 8 KG | 4,4 - 8,8 - 13,2 - 17,6 LB

## MODE OF USE AND

## APPLICATIONS

**1** TOOLS, **1000** USES

Thanks to the particular structure with linked, flexible and articulated rings, it can be used

- > as a KETTLEBELL
- > as a BATTLE ROPE
- > as a DUMBBELL
- > as a BULGARIAN BAG
- > as a BARBELL

and in a thousand other ways.

**REAX ACADEMY** supports business partners to create a network of local qualified and certified trainers hence to increase the visibility and use of our innovative training equipment. All our courses are conceived to train professionals on the **Neuroreactive Training Method** and on how to achieve better results in their market using our innovative equipment.

## REAX ACADEMY

A team of athletes, fitness professionals and qualified Master Trainers conceived a wide range of educational programs with a highly qualifying direction and a clear and simple method behind. There is an educational program available for each product range of REAXXER, with dedicated training courses that are held in REAX Academy or in house. For each training course, Personal Training and Group Exercises Manuals and Tutorial Videos are available. Marketing programs complement training programs to achieve full professional results.
